Stage

Each horizontal Stage pole is 110 cm long. If you make a 4 section Stage you make it 440 cm wide. The vertical poles are also 110 cm. There are two feet: the Oval foot and the Tripod foot. The Tripod foot adds an extra 7 cm to the final height.

The height of the stage graphic should be 1 cm shorter than the length of the vertical poles that holds the graphic up. Therefore, a Stage that is two poles high (220 cm) should have a graphic that is 219 cm in height. 16 cm should then be added to the overall height of the graphic, 8 cm at the top and 8 cm at the bottom, such that a tubular seam can be sewn into which the horizontal poles will then be inserted. A table has been provided below:

A Stage 2 poles high should be $219 \text{ cm} + 16 \text{ cm for the hem} = 235 \text{ cm}$.

A Stage 3 poles high should be $329 \text{ cm} + 16 \text{ cm for the hem} = 345 \text{ cm}$.

A Stage 4 poles high should be $439 \text{ cm} + 16 \text{ cm for the hem} = 455 \text{ cm}$.

A Stage 5 poles high should be $549 \text{ cm} + 16 \text{ cm for the hem} = 565 \text{ cm}$.

And so on...

When hung from the ceiling, the stage fabric can be any length so long as you have the room to hang it! The fabric will still require an extra 8 cm on the top and 8 cm on the bottom (16 cm in total) for the hem.
